INSTAGRAM REEL COVERS

With a faceless account, it is more important than ever to ensure you have a cohesive aesthetic that draws your audience in. Noted Pages brand board uses the brand colors and fonts to bring together very unique graphics used for backgrounds in the Reels. The example brand board on the second page follows a more cohesive graphics pattern to achieve cohesiveness. Use each of these for inspiration to decide what your Instagram aesthetic will look like... one or the other or a combination of colors, fonts, and similar graphics.

BONUS

Click the links to go straight to a Canva template, provided as a Bonus, where you can edit the covers, colors, fonts, etc.! This additional template utilizes videos for Reels. This is normally sold as part of a Social Media bundle with MRR license...[for more information about this bundle, click here.](#)
